

# OzLINK Mobile for NetSuite

Wireless productivity  
for your warehouse.

## 5 Things You Should Know...

### Incredible Results

OzLINK Mobile has been proven by over 150 NetSuite customers, as the most robust, flexible bar code scanning solution

### guided Walking paths

Streamline picking, put away, and inventory moves

### Wireless Mobility

Roam the warehouse without losing your key NetSuite capabilities

### Real-time NetSuite Communication

Handheld data capabilities with OzLINK will be as up-to-date as NetSuite

### Improve Warehouse Productivity

Reduces paper-based processes and eliminates manual NetSuite updates

**Over 600 active NetSuite customers use OzLINK for shipping, inventory and warehouse operations**

### Extend NetSuite to the Warehouse Floor

OzLINK Mobile brings you greater efficiency by extending NetSuite picking, receiving, work orders, and inventory control to the warehouse floor.

OzLINK Mobile is available in two editions: OzLINK Mobile Pro and OzLINK Mobile Enterprise. OzLINK Mobile Pro is specifically designed for less complex operations, while OzLINK Mobile Enterprise can be extended to meet the most sophisticated NetSuite requirements.

#### Order Picking

- Pick individual orders or many orders at once
- Leverage directed picking to improve efficiency
- Verify correct items are being picked at the shelf
- Use advanced picking models such as tote based picking, and optimization

#### Receiving and Put-away

- Quickly and accurately verify purchase order receipts on the dock
- Scan by UPC code, vendor code, or item number
- Easily move existing items between bins
- Receive and validate against advanced ship notifications

#### Inventory

- Determines how and what to count
- Accurately determines stock levels by using a "blind count"
- Reporting allows review of counts before committing to NetSuite
- Streamline replenishment to primary pick locations

#### Manufacturing and Work Orders

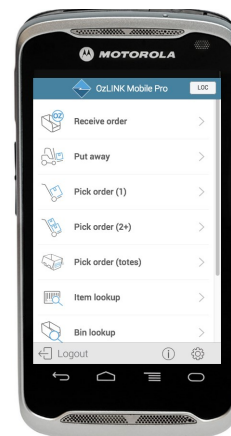

- Pick items and components for assemblies
- Allocate inventory real time during work order process
- Capture assembly build completion and automatically update NetSuite
- Print item labels with bar codes for item, serial number, and lot number
